**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. **Claims 1-4,6-8,10 and 11** are rejected under 35 U.S.C. 102(a) as being anticipated by **Kataoka US patent 6,313,564**.

**Kataoka'564** discloses a driving apparatus for vibration type actuator (5, column3,line 30-33 Fig.1), which makes driving vibration at a driving unit of a vibration member by applying an alternating signal ( 4, column3,line 61, a voltage generating means )to an electro-mechanical energy conversion element ( 5,column 3,line 35, Fig.1) and uses at least a frequency of the alternating signal ( column 4,line 65 ) as a speed control parameter (see column 4,line 60, frequency control speed), said apparatus comprising a driving circuit capable of changing a driving voltage ( 4, voltage generating device inherently changing the frequency and voltage ) of the alternating signal to be applied to said electro-mechanical energy conversion element (5, column 3 line 35,) and control circuit which controls said driving circuit so that at least an absolute value of a tilt of a frequency-speed characteristic of said actuator is within a desired range in a frequency band of predetermined range ( see column 3,4,5 ).

***Allowable Subject Matter***

3. **Claims 5,9** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
